

LNG REFUELING

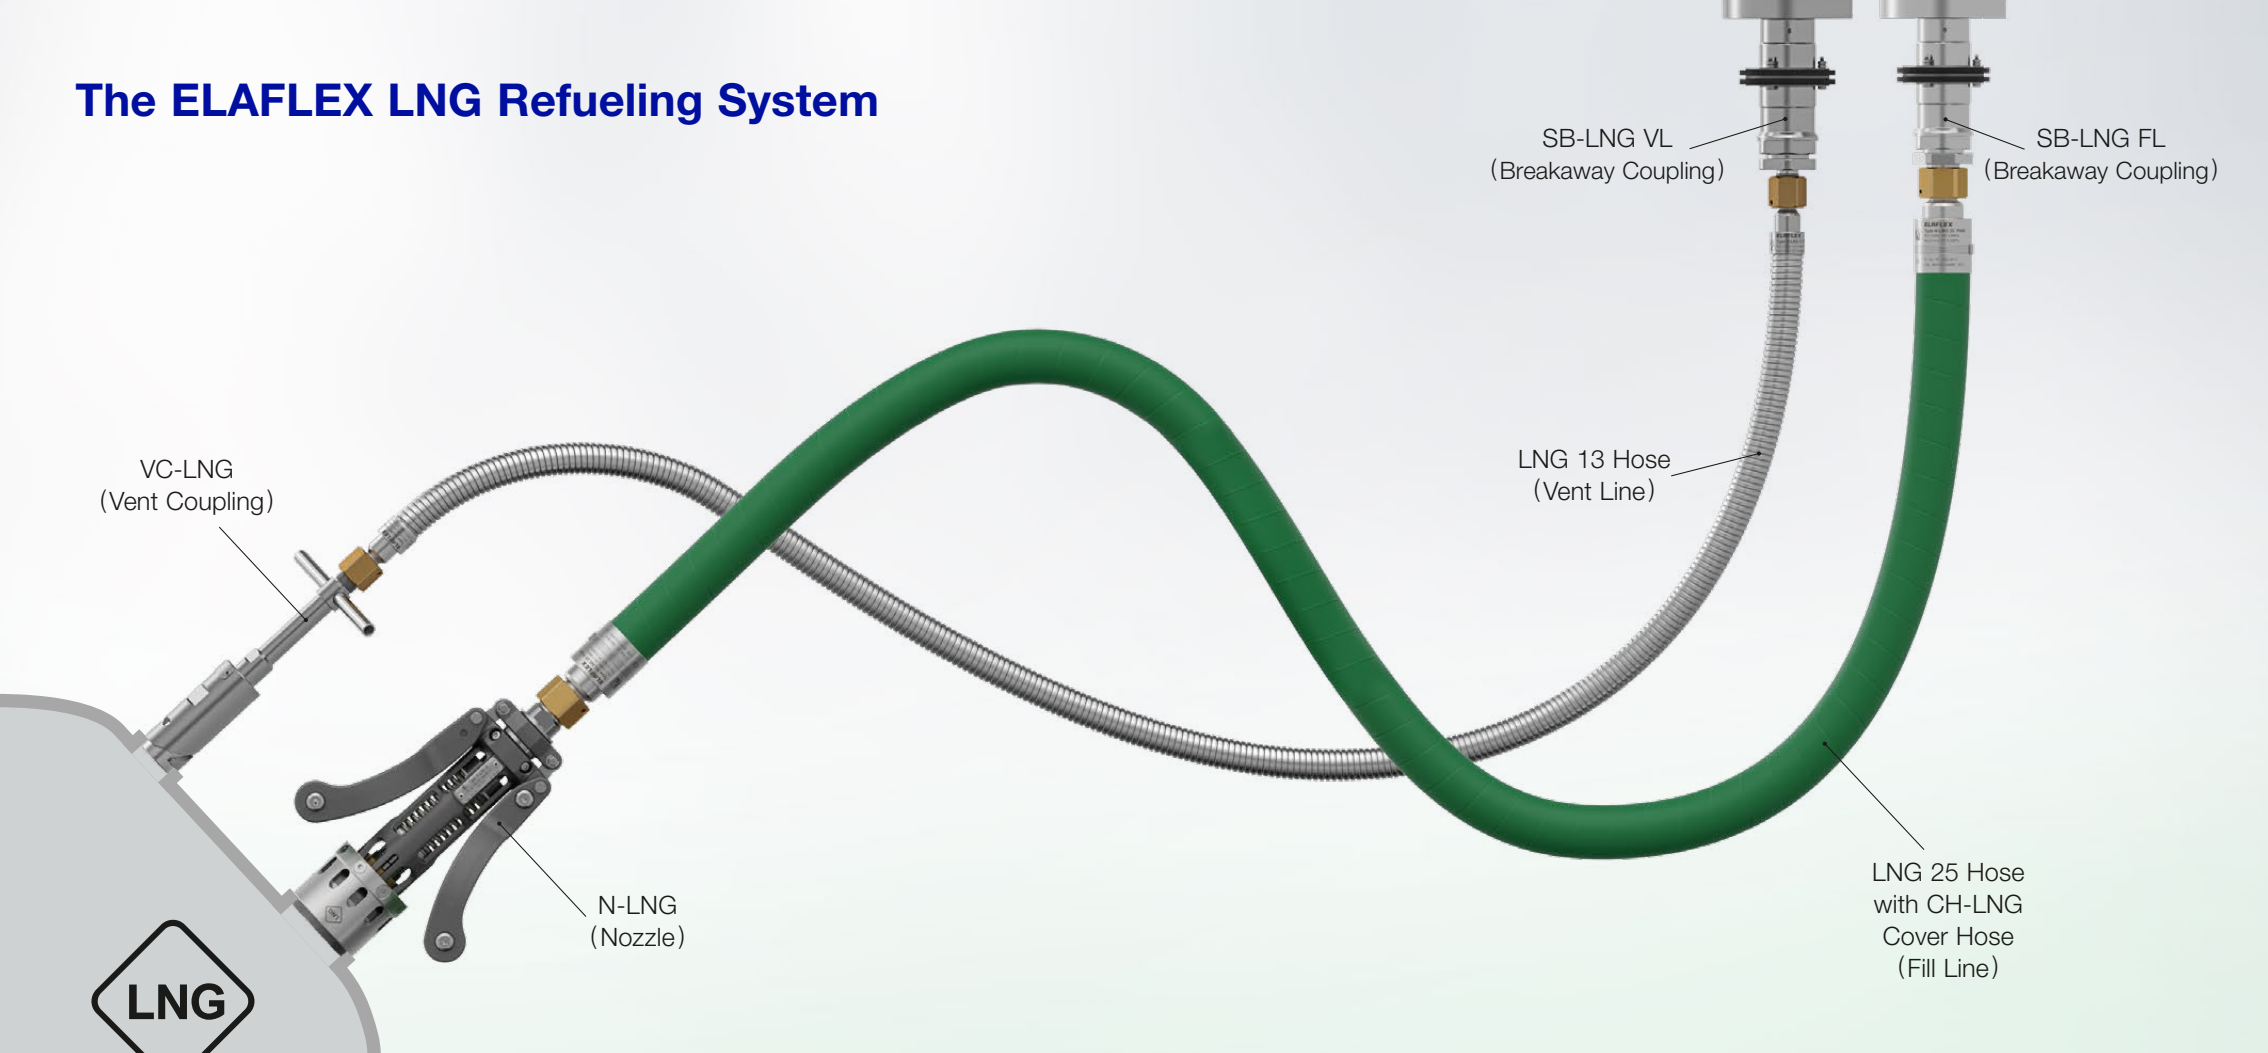

Trucks & Buses

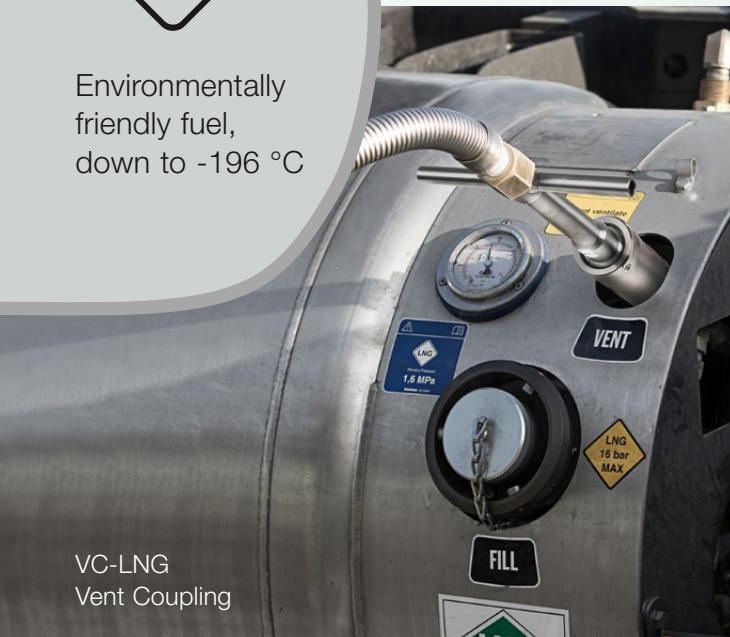

ELAFLEX

The ELAFLEX LNG Refueling System

Environmentally friendly fuel, down to -196 °C

VC-LNG Vent Coupling

SB-LNG Breakaway Couplings with LNG Hose Assemblies

N-LNG Refueling Nozzle

Reliable LNG Refueling Products

Liquefied natural gas (LNG) is considered as an alternative to Diesel refueling in the heavy-duty transport. The expansion of the LNG station network has accelerated in the recent years.

ELAFLEX is best known for its refueling nozzle and hose assembly range, globally used on petrol station forecourts. We have used our extensive knowledge to offer well-developed components for a safe and easy-to-use bus and truck refueling of LNG.

Advantages of our LNG Components

- High quality refueling products
- Superior service life
- Quick and easy exchange of N-LNG front seal without depressing the system
- Enable easy handling and prevent direct contact to cold components
- Delivery as complete, tested refueling system
- Short lead times
- Total lifetime cost benefits

Accessories

- Rain cover option to protect the refueling nozzle against outer influences
- Bonding reels of polyester powder coated steel or stainless steel, spring-rewind (any colour) or manual-rewind (ATEX approved)
- Cover hose CH-LNG

Optional:
'RC' Rain Cover for N-LNG nozzle

Optional:
Bonding reels

Spring-rewind

Manual-rewind
